

2017 Engineering Academic Days

Minnesota State University, Mankato

Centennial Student Ballroom

Oct. 16th, Oct. 30th, and Nov. 6th @ 9:00 a.m. – 1:30 p.m.

The main mission of the Engineering Academic Days is to encourage and motivate youth to pursue educational opportunities in the area of engineering and to increase their access to higher education. Each day focuses on a traditionally underrepresented population in engineering and STEM careers: African American, Latino, and females. Each event will provide students with an opportunity to meet professionals in the field of engineering and familiarize them with a post-secondary institution like Minnesota State University, Mankato. The events will include a college preparation session, keynote speaker, a tour, hands-on demonstrations, and highlights of the engineering profession. These events are for high school students.

October 16th

African American Engineering Academic Day

October 30th

Girls Explore STEM Academic Day

November 6th

Latino Engineering Academic Day
